### Container Range

- Time proven design for compact fuel storage in any application.
- ISO footprint enables easy relocation if required.

Our new generation tank range is a premium fuel storage solution designed for installation in a variety of applications with minimum site preparation.

Constructed to AS1940, AS1692 and AS1657, the unique design enables visual inspection underneath tank, for servicing requirements whilst increasing tank safe-fill capacities. Sloping tank floor for easy collection of contaminants or

condensation build-up. Multiple pump suction ports for submersible turbine pump applications, adaptable side ladder service entry, superior reinforced construction, are just some of the features of our new outstanding ET range tanks.

Sizes available: 30,000, 67,000, 72,500, 82,000 and 88,000 Litres safe fill. These tanks will meet and exceed all your storage requirements for remote retail use, additional storage or tank farms.
