Bottom fill kits have proven to be the cheapest and easiest way to comply with OHS **SAFETY REQUIREMENTS** which are now being enforced. Equipco kits are supplied with all required pipes and fittings. Kits are suitable for both Tripod and Saddle style (pictured below) overhead tanks. We can also customise kits to suit your tank. Extra discounts available for bulk quantities. Call our sales team today for your best price possible.

Full assembly instructions are provided for easy installation.
A mark out dimension sheet is available for verification for each tank required.
Extra pipe lengths or fittings available for non-standard applications.

- Bottom fill kit includes: Fittings, Valves, camlocks, 2 x 900mm 1 1/2" gal pipe pieces, 200mm pipe piece, tee, 2 pipe brackets with all thread, 2" plug for adding fuel additives if required and thread tape.
- Designed for easy installation to standard tripod or horizontal style tanks where fill point is within 200mm from tank edge and overall height maximum is 3.2 Mtrs
