Tanks made in roto-molded linear polyethylene, ideal for the refuelling of small and light operating vehicles or crafts.

Featuring a unique design with ergonomic grip for excellent handling and lifting, are equipped with pneumatic wheels suitable for transport on any surface.

The structure, devoid of sharp corners, and the reinforcement ribs give great strength and resistance.

Available with capacities of 55 and 110 litres, are equipped with filling plug with integrated air vent device, lower safety tap and a complete fuel transfer unit.

Equipco Caddy range, thanks to versatility and ease of use, allows almost unlimited refuelling operations both in professional fields and in sport or leisure activities.
