

MANUAL FUEL DISPENSING NOZZLES

Equipco manual fuel nozzles are manufactured from cast aluminium with heavy duty design features giving efficient operation. While simple in design, these nozzles are fully serviceable, including interchangeable diesel and unleaded spouts. A range of replacement parts are always available.

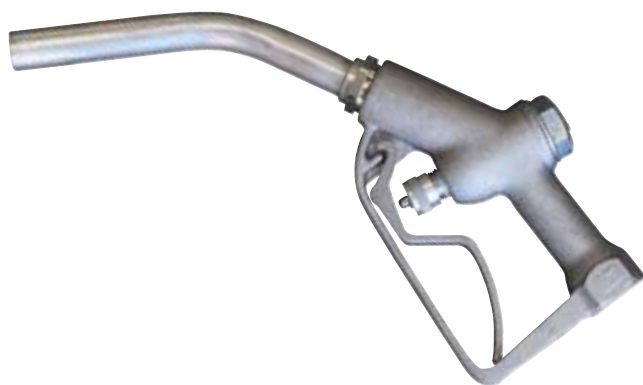

SF200NL

Premium fuel trigger nozzle for gravity or pump applications.

Features:

- Screw out curved diesel or unleaded petrol spout.
- Smooth quality alloy construction.
- 1" BSP swivel hose connection.
- Service cap fixed by 4 screws.
- Hold open spring activated lever latch.
- Efficient flow through design.

498-D

- Extra Premium 498 manual nozzle, heavy duty.
- Made in the USA.
- Aluminium heavy duty body.
- 1" BSPF inlet.
- Buna seals standard.
- UL listed.
- Excellent throttling characteristics provide fast and accurate deliveries with top off control.
- Optional viton seal for unleaded fuels available.

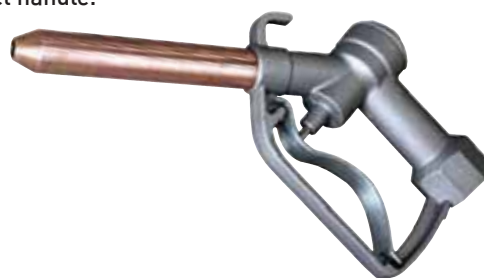

10A20

Budget Fuel Trigger Nozzle for diesel or unleaded petrol. Quality product, proven design for gravity fuel storage tanks or farm pump applications.

Features:

- Screw out diesel or unleaded spout.
- Lightweight aluminium construction.
- Stainless steel stem.
- 'O' ring seals.
- 1" BSPF threaded inlet.
- Steel handle.

TN1025

- New design slump gun nozzle with hardened copper tube with 10mm reduced spout. Used by concrete trucks for adding water or wash down operations.
- 1" BSP inlet with steel handle.
