

BOTTOM FILL KITS

Obviously the cheapest and easiest way to comply with OHS SAFETY REQUIREMENTS which are now being enforced. Equipco kits supplied in 3 parts, all of which are required to comply with Australian Standard Requirements and are for diesel fuel only. Full assembly instructions are provided for easy installation. A mark out dimension sheet is available for verification for each tank required. Extra pipe lengths and/or fittings available for non-standard applications.

BFK1N

Bottom fill kit includes: Fittings, valves, camlocks, 2 x 900mm 1½" gal pipe pieces, 200mm pipe piece, tee, 2 pipe brackets with all thread, 2" plug for adding fuel additives if required and thread tap. Designed for easy installation to standard tripod or horizontal style tanks where fill point is within 200mm from tank edge and overall height maximum is 3.2mt.

Code	Description
