

# NOZZLES

## 1" AUTO SHUT-OFF DIESEL NOZZLE

**DURABLE CAST-ALUMINIUM STRUCTURE**

**25mm Auto shut-off diesel nozzle for high-pressure and rapid refuelling**

The A120H is an automatic diesel nozzle designed for high-pressure, high-flow refuelling systems. It is engineered for applications requiring rapid fuel transfer, making it suitable for large tanks, fleet vehicles, and heavy equipment.

| ITEM CODE | DESCRIPTION                                                             | FLOW RATE | MAX. WORKING PRESSURE | INLET         | CONSTRUCTION |
|-----------|-------------------------------------------------------------------------|-----------|-----------------------|---------------|--------------|
| A120H     | 1" High Pressure Auto Diesel Nozzle - Black cover. 135 LPM max. 50 PSI. | 135 LPM   | 50 PSI                | 25mm (1") BSP | Aluminium    |

### FEATURES & ADVANTAGES

#### ACCELERATED REFUELLING

The high-flow design allows significantly faster filling compared to standard nozzles, helping to reduce refuelling time and improve operational efficiency.

#### ENDURING DURABILITY

Internal flow paths are optimised to handle increased pressure while maintaining smooth and controlled fuel delivery. Manufactured from durable cast aluminium, the nozzle is built for demanding environments and continuous use.

#### OVERFILL PROTECTION

An integrated automatic shut-off mechanism assists in preventing overflow and spillage during high-volume dispensing.

#### OPTION AVAILABLE

A120H-SW

1" High Pressure Auto Diesel Nozzle with swivel. 135 LPM max.

**EFFORTLESS REFUELLING FOR:** AGRICULTURE • TRANSPORT • EARTHMOVING • MINING • TIMBER • CONSTRUCTION • MARINE • WASTE
