5-micron Clear Bowl Fuel Filter for Diesel

The Clear Bowl Fuel Filter for diesel is a flange-mounted, 5-micron cartridge filter designed to safeguard engines by ensuring the fuel supplied from storage or dispensing stations remains clean. With a flow capacity of 70 litres per minute, it efficiently captures fine particulates commonly found in diesel storage tanks.

IF705	Clear bowl fuel filter for diesel 5 micron - flange mount with drain tap 70 l/min.	F 1"- F 1" BSPG	70 LPM	Diesel

FEATURES AND ADVANTAGES

INTEGRATED DRAIN TAP

Tool-free drain valve allows quick, clean removal of contaminants — enhancing operational efficiency.

5-MICRON PARTICULATES FILTRATION

Effectively removes fine contaminants from diesel, safeguarding engine performance and longevity.

CLEAR BOWL WITH DRAIN TAP & 70 L/MIN FLOW

Enables visual monitoring and easy draining of contaminants, with high flow capacity for uninterrupted fuel delivery.

FLANGE-MOUNTED, 1" BSP - BUILT FOR AUSSIE USE

Robust, standards-compliant design with generous capacity, engineered for reliable, low-maintenance operation in demanding environments.

REPLACEMENT AVAILABLE

IF005	Replacement element to suit IF705. 5 Micron.

FUEL-POLISHING CARTRIDGE FILTER

Designed to protect engines by removing contaminants from diesel fuel supplied via storage or dispensing stations. As diesel may contain impurities introduced during delivery or storage, the filter actively captures particulates — ensuring only clean fuel reaches the engine.
