

CUBE TANKS

2000-LITRE MINE-GO
CUBE SELF-BUNDED
DIESEL FUEL TANK

BUILT TO AUSTRALIAN STANDARDS AS1940 AND AS1692

Comes with a lockup pump compartment, lockable pump bay with service fill and suction ports

As a premier offering within the MGS tank range, the 2000-litre MINE-GO Cube self-bunded diesel fuel tank is built exceptionally tough to meet the rigorous demands of mining standards. Featuring a 2000-litre SFL, this robust unit is engineered for optimal site efficiency, incorporating a secure lockup pump compartment alongside dedicated fill and suction ports for controlled fuel management. Fully compliant with Australian Standards AS1940 and AS1692, the MINE-GO Cube delivers uncompromising safety, environmental containment, and reliable performance in the most challenging operational environments.

ITEM CODE	DESCRIPTION	CAPACITY	TYPE	COMPATIBILITY
MGS2000C	2000 Litre MINE-GO self bunded diesel fuel tank with lockup pump compartment. Includes lockable pump bay with service fill and suction ports. SFL 2000 litres.	2000 Litres SFL	Self-bunded	Diesel

FEATURES & ADVANTAGES

MAXIMUM OPERATIONAL DURABILITY

As a premium offering in the MGS tank range, this 2000-litre cube is built exceptionally tough to exceed rigorous mining standards, ensuring long-term reliability and resilience in the harshest site environments.

SECURE FUEL MANAGEMENT

The integrated lockup pump compartment, featuring dedicated fill and suction ports, provides controlled and authorised fuel handling, protecting critical components from unauthorised access and operational hazards.

COMPLETE REGULATORY COMPLIANCE

The robust self-bunded construction is strictly manufactured to Australian Standards AS1940 and AS1692, delivering superior secondary containment to safeguard the environment and ensure full site compliance.

DESIGNED FOR UNCOMPROMISING
SAFETY AND PREMIUM REALIABILITY

RANGE & OTHER TECHNICAL DETAILS

PREMIUMLY TOUGH

The Mine-Go Self-Bunded tank range is engineered for the hire and heavy-duty contractor sectors. These tanks feature heavy-duty crash lift lugs, tie-down points, and optional certification for lifting when full. With a fully lockable pump bay, internal baffles, and rugged underside bearers, the diesel variants are entirely suited for the transport of fuel on public roads and remote sites.

The system supports advanced bracketry for solar, filtration, and hose reels, plus the GIR Fuel Management System for cloud-based reporting. While diesel and waste oil models (featuring a gas-strut pourer) are built for transport, petrol variants are strictly for static, on-site use in compliance with Australian regulations.

Purpose-built fuel containment designed to withstand the rigorous conditions of Australian mining and infrastructure projects.

SPECIFICATIONS

CONSTRUCTION & MATERIALS	Steel
COMPLIANCE & CERTIFICATIONS	AS1940 and AS1692
SAFETY FEATURES	Bund capacity, overfill protection, venting, earthing provisions, and emergency access.
INTEGRATIONS	Compatible filtration and water separation systems, port configurations.
INSTALLATION & SITE REQUIREMENTS	Foundation specs, access clearances, delivery dimensions, lift points, and remote site logistics.
OPTIONAL ACCESSORIES & ADD-ONS	Pumps, level gauges, telemetry/monitoring, lockable dispensing cabinets, custom colours.
DIMENSIONS (MM)	2256mmL x 1448mmW x 1280mmH,
WEIGHT	1010Kg

OPTIONAL ADD-ONS

MGS tank ranges may be upgraded based on operators' needs. Sample

AVAILABLE FOR WASTE OIL AND PETROL OPTIONS
