BLUWASH STAINLESS STEEL PRESSURE WASHER SPRING REWIND HOSE REEL | BLUWASH

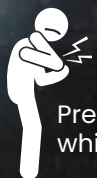

WHEN INNOVATION MEETS SAFETY

Introducing slow rewind system that controls the speed of the retraction minimising the risk of high-impact rewind ensuring operator's safety and longevity of the reel. The hose under tension when sudden released can produce high force that can damage equipment and injuring someone.

Made from top grade stainless steel construction, making it highly resistant to corrosion, moisture, salt, and UV damage. Providing long-lasting high strength and maintaining the integrity even in harsh Australian environment, built for serious pressure washing applications.

SLOW REWIND

Prevents
whip injury

Extends
reel's life
span
