for your dispensing requirements.

**MADE IN USA**

#### Water Finding Paste

Non hazardous paste for detecting water in diesel and petrol tanks.  
85 gram squeeze tube

**\$48.40**

Code: WP

A water finding paste to check your fuel tanks & storage for potential  
contamination by water.

Simply put some paste on the end of a stick or rod. Insert it into the tank all the  
way ,if possible, to the bottom. If there is water present, the paste will change  
colour from yellow to red.

If there is contamination in the fuel, this can lead to bacterial and algae blooms  
which will degrade the fuel and potentially damage machinery. There is also the  
risk of water getting into the injector systems directly causing expensive repairs.  
There is enough paste in each tube for multiple uses

**MADE IN AUSTRALIA**

#### Fuel Conditioner

This is an Australian made fuel conditioner suitable for petrol, diesel and  
biodiesels.

Techno Klean is engineered to remove water and its inherent biocide will also  
remove harmful bacteria and similar in the fuel.

1 litre will treat up to 4000litres of fuel.

Larger bottles are available.

**\$126.35**

Code: TNK-1

1 Ltr bottle. Treat up to 4,000 Ltr
